SUMMARY

B.E. Information Technology graduate (CGPA 3.91/4.0, Full Merit Scholar) with hands-on experience as a Cyber Security Intern at Mindrisers Technologies. Skilled in penetration testing, network security, SIEM/SOC operations, and Python-based security tooling. Built a real-time Network Intrusion Detection System using machine learning, and conducted end-to-end network vulnerability assessments. Holds an AWS Skill Builder badge and certifications in Network Analysis and OSINT. Passionate about solving problems at the intersection of software and security.

EXPERIENCE

Mindrisers Technologies

Kathmandu, Nepal

Cyber Security Intern

2026 – Present

- Conducting vulnerability assessments and penetration tests on client systems using Nmap, Burp Suite, and Metasploit Framework.
- Monitoring and analysing security events through SIEM dashboards; identifying and escalating threat indicators with documented findings.
- Supporting network defence tasks including traffic analysis, log review, and reporting with prioritised remediation steps.

EDUCATION

Cosmos College of Management and Technology

Sitapaila, Kathmandu

B.E. Information Technology — Pokhara University — CGPA: **3.91/4.0** — Full Merit Scholar

2021 – 2025

- Relevant Coursework: Computer Networks, Network Programming, Data Structures & Algorithms, OS, Database Management, Information Systems, Intelligent Systems, Software Engineering

Texas International College

Mitrapark, Chabahil

NEB +2 Science — GPA: **3.36/4.0**

2019 – 2021

Shree Ma.Vi Rakathum

Rakathum, Ramechhap

SEE — GPA: **3.35/4.0**

2015 – 2019

TECHNICAL SKILLS

Programming Languages: Python, C, SQL, HTML/CSS

Networking: TCP/IP, DNS, DHCP, LAN/WAN, VLANs, Subnetting, PCAP Analysis, Wireshark, Nmap

Security & OS: Linux (Kali, Ubuntu) CLI, Nmap, Metasploit Framework, Wazuh, FTK Imager, Autopsy, Burp Suite, OWASP Top 10, OSINT

Cloud & Frameworks: AWS (EC2, S3, IAM, VPC) — Skill Builder Badge; Django; Git/GitHub; Machine Learning

PROJECTS

Real-Time Network Intrusion Detection System (ANIDS) | Python · Wireshark · PCAP · ML

2025

- Designed a two-stage ML pipeline combining signature-based and anomaly-based detection to classify live network traffic; measurably reduced false-positive alerts over a single-model baseline.
- Captured and parsed PCAP files with Scapy/Wireshark; engineered 20 traffic features fed into the detection model — github.com/rosangithub/ANIDS-model-two-stage

DDoS Attack Classification Model | Python · ML · Networking

2025

- Trained a machine learning model to detect and classify Distributed Denial-of-Service (DDoS) attacks in real-time network traffic, distinguishing attack patterns from benign flows — github.com/rosangithub/DDos-Clasification

Malware Finder | Python · Metasploit · Security Analysis

2025

- Built a tool to identify and analyse malware in computer systems using signature and heuristic-based detection by scanning processes, files, and network activity for indicators of compromise — github.com/rosangithub/Malware.Finder

End-to-End Network Security Assessment | Linux · Kali · Nmap · DNS Enumeration · DVWA

2024

- Performed full vulnerability assessment: OSINT, footprinting, subdomain hunting, port scanning, service fingerprinting, privilege escalation, and password cracking; documented findings with prioritised remediation steps.

Social Media Web Application (LinkUp) | Python · Django · SQLite

2025

- Built a full-stack social media app with secure authentication, input validation, and protection against OWASP Top 10 vulnerabilities (CSRF, SQLi, XSS) — github.com/rosangithub/SMA

TRAINING & CERTIFICATIONS

Mindrisers Institute of Technology

Kathmandu, Nepal

Cybersecurity Training — Penetration Testing, Threat Detection, Network Defense, SOC & SIEM

Dec 2025 – Mar 2026

AWS Cloud Quest: Cloud Practitioner — Skill Builder Badge | Amazon Web Services

2026

- Completed scenario-based cloud labs covering AWS architecture: EC2, S3, IAM, VPC, cloud security, and cost optimization.

Introduction to Network Analysis | **Introduction to OSINT** | Security Blue Team

2025

- Certified in packet-level network analysis (Wireshark) and structured OSINT intelligence-gathering methodologies.

Campus Network Design Training | NREN — Nepal Research and Education Network

2024

- Hands-on LAN/WAN design, network infrastructure planning, and campus-level connectivity deployment.

ACHIEVEMENTS & AWARDS

- **University Topper** — Perfect 4.0 GPA, Semester 3; ranked **1st in batch**, Pokhara University.
- **Full Merit Scholarship** — Pokhara University BEIT Programme (2021 – 2025).
- **Soma Kanta Khanal Memorial Mathematics Excellence Award** — Top rank in Mathematics, BEIT Semester 1, Cosmos College (July 2023).
- **NASA Space Apps Challenge Hackathon** — Team participant, NRCC Kathmandu (2023).
